Brief Introduction

Founded in 1996, SUMEC Textile & Light Industry Co.,Ltd. is a core subsidiary of the listed SUMEC Corporation Limited, which is affiliated to SINOMACH, a state-owned Fortune Global 500.

For more than 20 years, we have been focusing on textile and garment R&D, manufacture and trade. With a global vision, we adhere to the strategic positioning of "supply chain & industrial chain", attach importance to technology innovation, and continue to build strong supply chain integration capabilities and industrial chain operation capabilities. We are determined to become a digitally-driven, industry-leading textile and garment company.

Seven Inventions, Ten Leading Technologies, Biobased Materials Winning Awards in China

We are committed to developing green and eco-friendly functional materials. Currently, we have 7 invention patents and 10 technologies that have reached the leading level in China. Key R&D of biobased materials based on renewable biomass, winning multiple domestic awards. Among them, the biobased nylon 56 cool fabrics and woolen like fabrics have been successfully applied to production.

Biobased nylon 56 cool fabrics

Polyhalogenated amine and quaternary ammonium salts synergistic organic antibacterial fabrics

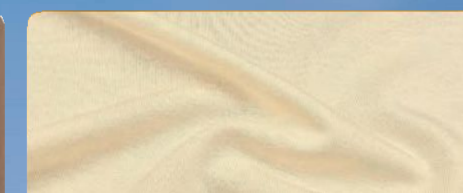

Intelligent temperature-controlled functional fabrics

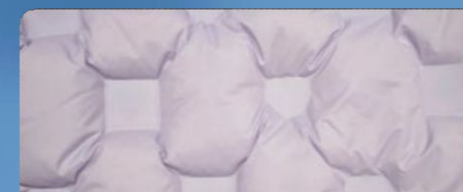

Fluorine free waterproof and easy to stain functional fabrics

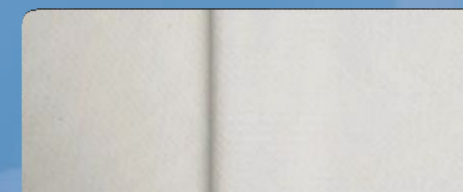

Research on the identification technology of polyester/polyamide fiber products

Antibacterial and warm underwear fabrics

Direct filling fine denier biobased PA56 anti feather fabrics with foam printing

Super fast drying and UV resistant knitted sports fabrics

Green and environmentally friendly recycled polyester/cellulose fiber composite fabrics for outdoor use

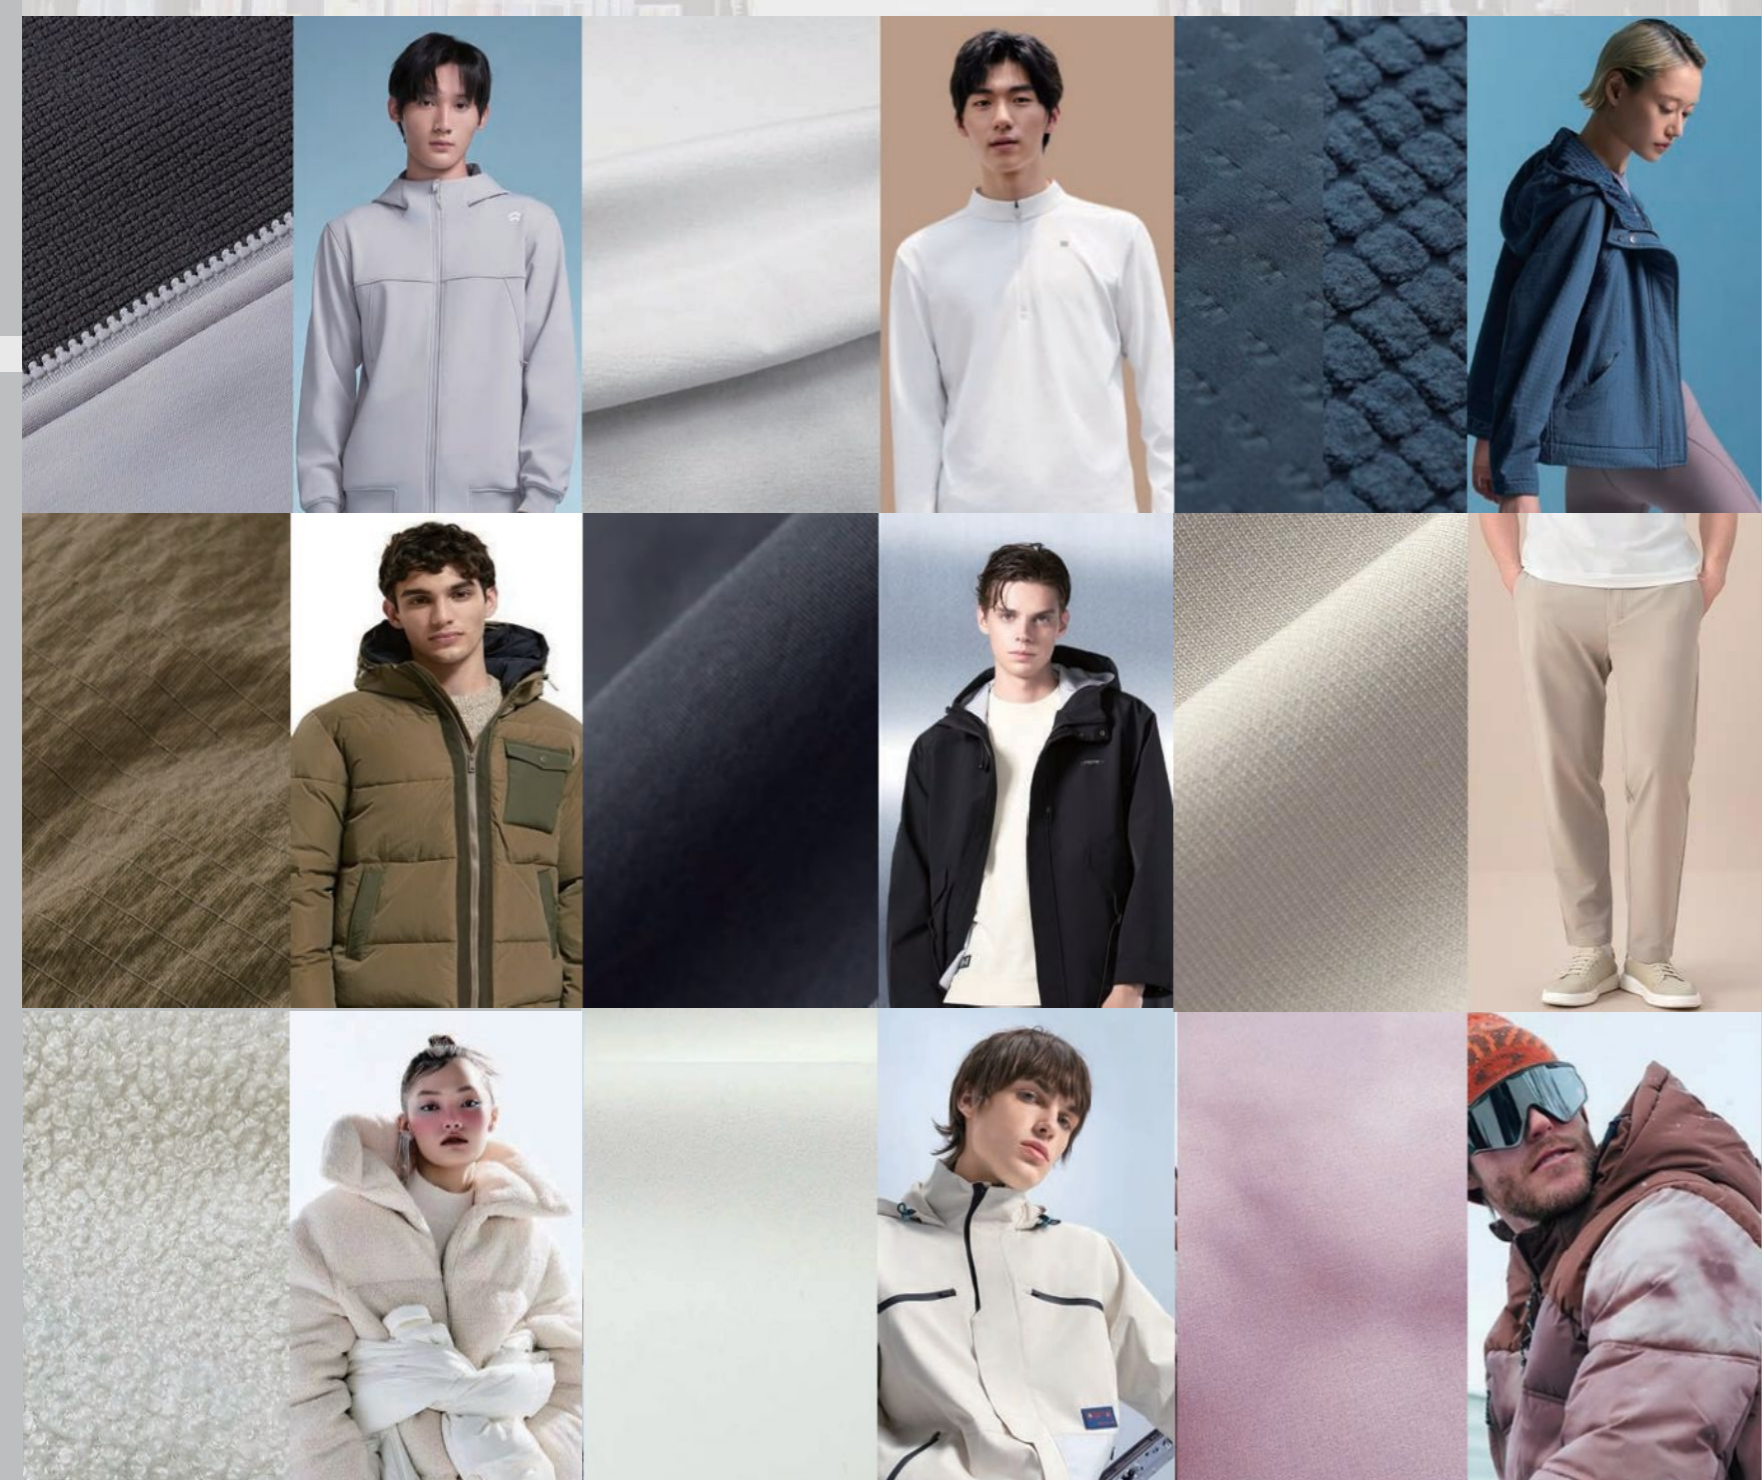

Fabric R&D

We focus on providing fabrics of

- ✓ Green
- ✓ Organic
- ✓ Eco-friendly
- ✓ Recycled

Fabric Library

- **Research and integration:** Iteration of new fabric sample R&D, integration of popular fabric resources, and continuous updating of stock resources.
- **Interconnection:** DOP online library, 3D library, offline library, multi-platform information interconnection, diversified promotion and display.
- **Sharing:** Cross recommendation of popular fabrics, comprehensive sharing of fabrics in the library, providing clients with an immersive online sample selecting venue.
- **Innovation:** 4,000 new patterns and varieties of fabrics independently developed throughout the year.

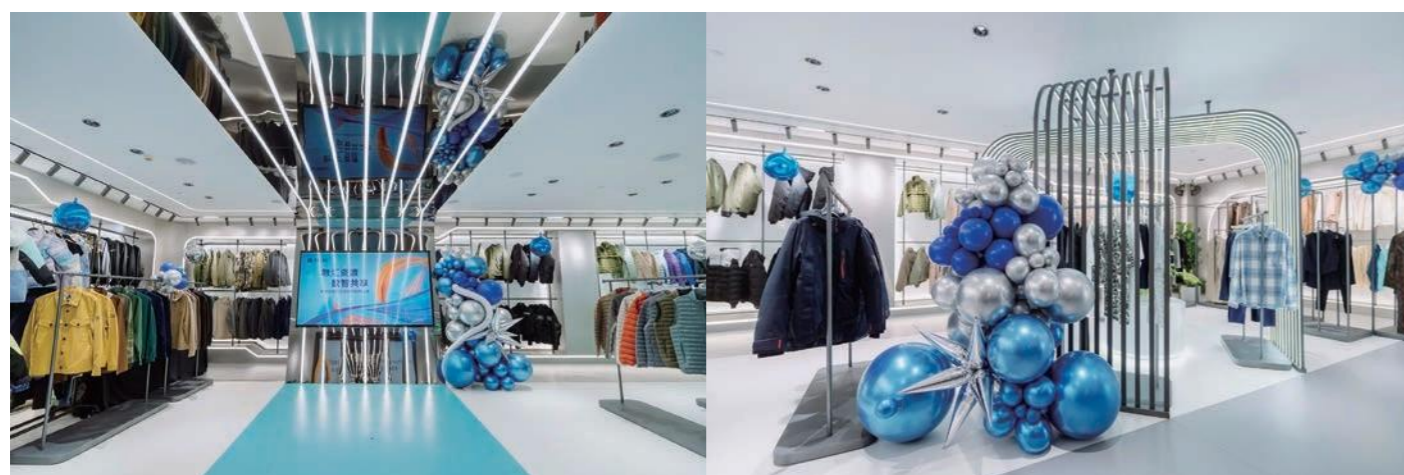

Fashion Design

We have a team of global designers from countries like China,UK,USA, Germany, Spain,catering to clients' requirements with their outstanding,experienced and professional skills,and being informed of the latest market trend and the most fashionable style and fabric in Western countries.By their efforts,over 2,500 internationally popular fashions are being researched and developed each year.

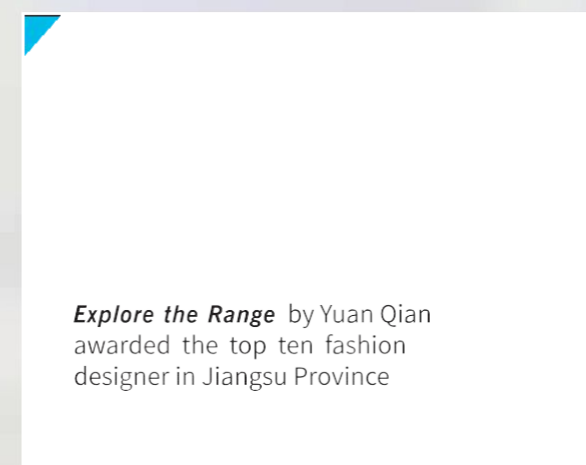

We have many design studios which are striving hard to build the ODM brand of SUMEC with their knowledge on fashion and trend.

Style Library

- **Sky Showroom:** Shared style resources and technical data.
- Improve the timeliness and standardization of SUMEC keeping sample.
- Display trends and dynamics in different markets and categories.
- Realize traceability management of R&D conversion rate.

Paris Olympics Themed Clothing, Designed by SUMEC

Digital R&D

SUMEC R&D platform utilizes 3D and AI digital technology to assist in design and development, significantly improving R&D efficiency.

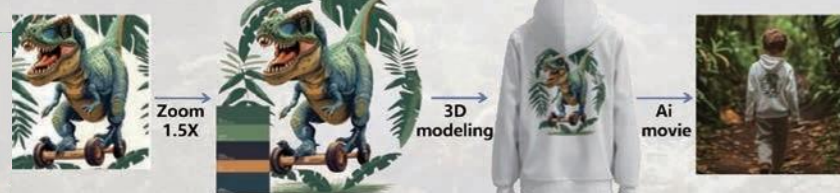

3D建模 3D Modeling	
 <p>Increase the efficiency of sample design and development. Increase collaboration efficiency with clients.</p>	 <p>Reduce sampling costs. Reduce physical sampling and environmental pollution.</p>
 <p>Accelerate product launch. Shorten development cycle.</p>	 <p>Accumulate resource precipitation, forming a powerful database for secondary development and data analysis.</p>

Sample Development

With 350 professional garment technicians and sewing workers, SUMEC garment technology R&D center has an annual sampling capacity of over 100,000 pieces of garments.

- Standard SOP for sampling to improve efficiency.
- BI real-time monitoring, sampling visualization.
- Intelligent CAD software for garment production and operation.
- Efficient and integrated garment cutting equipment system.
- Standard mannequins of major mainstream clients.
- World-class advanced machinery.

英国皇室御用品牌WOLSEY总代理

SUMEC is unrivalled as a domestic manufacturer of garments in Chinese mainland and has served the British brand WOLSEY (Royal Warrant Holders by Appointment to Her Majesty The Queen) for over 20 years. In 2019, SUMEC took control of the marketing of WOLSEY in Chinese mainland.

The brand WOLSEY was established in 1755. It is a British outdoor sports brand and is the brand of choice of many of the elite members of European royal households and also famous athletes. WOLSEY golf apparel is well respected among professionals worldwide and is renowned for its fashion-forward products.

As one of the world's most enduring brands with a history of 270 years, WOLSEY stores are located across three continents, eight countries worldwide, with two in Chinese mainland.

QA & CSR

We follow the general social values and business ethnics. While creating values for the world, we pay back the society from different aspects. Our facilities have passed social and quality audits by many world-class famous brands owners or their auditing agents.

We advocate a green environment and support sustainable development. For a long time, we have been purchasing sustainable raw materials, researching and developing sustainable production technologies, creating sustainable products, and protecting the environment in all aspects. At present, sustainable products have covered all clothing accessories such as fabrics, zippers, buttons, plastic products.

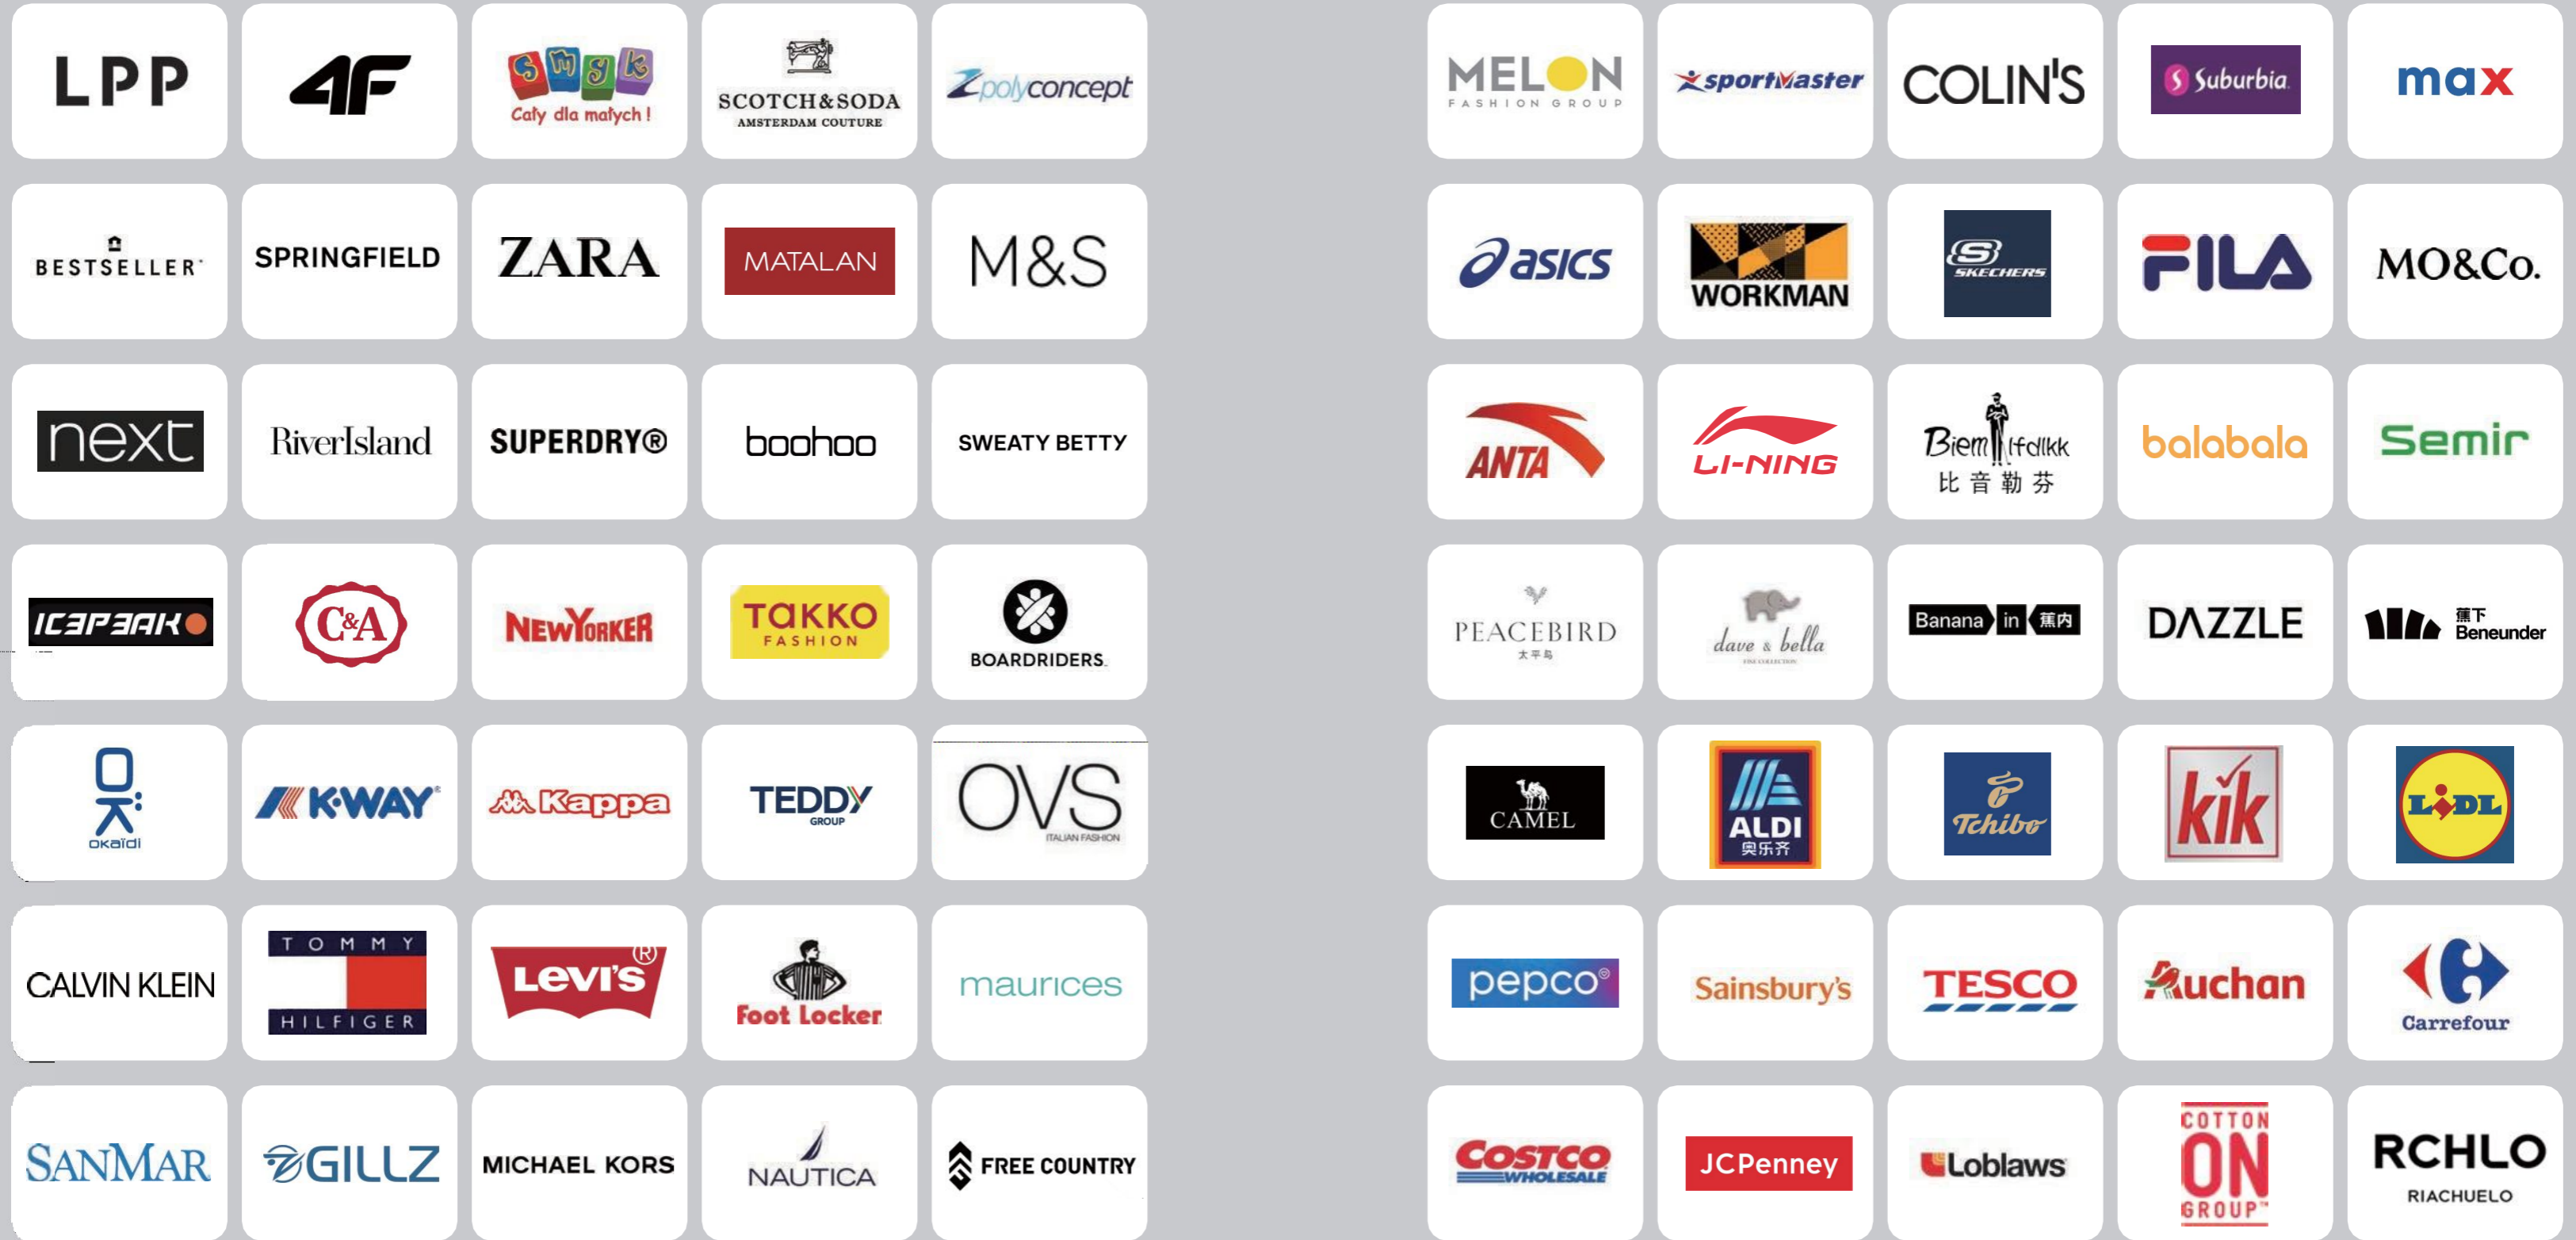

UN Women China WEPs Award

Women's Empowerment Principles (WEPs) are a set of principles launched by UN Women and the UN Global Compact in 2010 offering guidance to business on how to promote gender equality and women's empowerment in the workplace, marketplace and community. SUMEC Textile & Light Industry Co., Ltd. won the "Gender Inclusive Workplace Award" of the WEPs of the UN Women China.
